January 19, 2015

Parents,

Report cards were delayed this semester. Our district implemented a new student information and grade book system this year. This system is very flexible to support teachers in their individual grading practices. This flexibility requires a great deal of precision.

We have verified that all student grades are accurate and reflect your student's work and the teacher’s assignments and tests. In completing that process we have found some students' grades may have changed from those already posted. You will see the recalculated grades on the current report card.

If that is the case and your student is now earning a higher grade for either term, then that higher grade has been posted and will be shown on this report card. If your student has lower grades now than those you have seen on earlier report cards your student's teacher is available to meet with you to discuss those grades. Please contact your school or the individual teachers to set up teacher conferences if you wish to discuss any grades your student earned.

We are confident that each student's report card accurately reflects their work and their teachers' expectations for the earned grades. Thank you for your patience as we verified each student's grades.

Brad Winter
Superintendent
